

## CONTENTS OF VOLUME 19

### Number 1

- |  |    |   |
|--|----|---|
| <i>K. Francis</i>                                    | 1  | Anaerobic threshold   |
| <i>T. Penzel and J. Petzold</i>                      | 7  | A new method for the classification of subvigil stages, using the Fourier transform, and its application to sleep apnea |
| <i>R. Bermejo and H. P. Zeigler</i>                  | 35 | A microcomputer-based system for multi-channel neurophysiological recording   |
| <i>E. L. Kinney, R. J. Wright and J. W. Caldwell</i> | 55 | Value of clinical features for distinguishing myxedema ascites from other forms of ascites                              |
| <i>J. Lee, D. Koh and C. N. Ong</i>                  | 61 | Statistical evaluation of agreement between two methods for measuring a quantitative variable                           |
| Software Survey Section                              | I  |   |

### Number 2

- |  |     |  |
|--|-----|--|
| <i>E. De Schutter</i>                              | 71  | Computer software for development and simulation of compartmental models of neurons                  |
| <i>Chau-Jen Lee, Shih-Tong Hsu and Su-Chieh Hu</i> | 83  | A one-compartment single-pore model for extra-corporeal hemoperfusion                                |
| <i>Cheng Tu and C. S. Peskin</i>                   | 95  | Hemodynamics in transposition of the great arteries with comparison to ventricular septal defect     |
| <i>W. K. Prusaczyk</i>                             | 129 | Precise water vapor pressure value calculations  |
| <i>Kam Pui Fung</i>                                | 131 | A computer program in BASIC for estimation of ED <sub>50</sub> and LD <sub>50</sub>                  |
| <i>J. Lee, Hin-Peng Lee and Ngan-Phoon Fong</i>    | 137 | A SAS procedure for exact probability testing of difference between sample and population proportion |
| <i>C. Sundqvist, A. Mayerhofer and S. Hodges</i>   | 145 | A radioimmunoassay program for Lotus 1-2-3   |
| Software Survey Section                            | I   | COENOS   |

### Number 3

- |   |     |   |
|---|-----|---|
| <i>H. D. Landahl, J. Garzon and N. M. Lee</i> | 151 | Computer analysis of the effect of beta-endorphin and dynorphin and related compounds on opioid binding to mouse brain membrane |
|---|-----|---|

<i>E. H. Twizell</i>	163	The global extrapolation of numerical methods for computing concentration profiles in percutaneous drug absorption
<i>G. P. Kossekova, N. C. Vrabchev and L. M. Sirakov</i>	173	A program package for self-assessment and examination in biochemistry
<i>W. C. J. Hop and H. R. van Buuren</i>	181	A method to evaluate changes in prognostic status during follow-up, illustrated by an assessment of the effect of a rebleed in patients with oesophageal variceal bleeding
<i>R. E. De Meersman</i>	189	New noninvasive computerized method for the area measurement of the aortic notch
<i>W. Schreiner</i>	197	Software interface between SAS and the GDDM interactive chart utility
Erratum	203	
Announcement	205	Second Symposium on Computer-Based Medical Systems
Software Survey Section	I	

#### Number 4

<i>J. B. Korten and G. G. Haddad</i>	207	Respiratory waveform pattern recognition using digital techniques
<i>S. S. Trivedi and R. C. Gur</i>	219	Topographic mapping of cerebral blood flow and behavior
<i>J. H. Milsum</i>	231	Determining optimal screening policies using decision trees and spreadsheets
<i>S. J. Aggarwal, S. J. Shah, K. R. Diller and C. R. Baxter</i>	245	Fluorescence digital microscopy of interstitial macromolecular diffusion in burn injury
<i>R. Biscay Lirio, P. A. Valdés Sosa, R. D. Pascual Marqui, J. C. Jiménez-Sobrino, A. Alvarez Amador and L. Galán Garcia</i>	263	Multivariate Box-Cox transformations with applications to neurometric data
<i>R. Nussinov</i>	269	The ordering of the nucleotides in DNA: computational problems in molecular biology
<i>F. Alemi, F. Cherry and G. Meffert</i>	283	Rehearsing decisions may help teenagers: an evaluation of a simulation game
Corrigendum	291	
Announcements	293	

## Software Survey Section

### I CVR

### II The Professional Dietitian

### II MIRRORS/II Connectionist Simulator

### Number 5

- |   |     |   |
|---|-----|---|
| <i>S. Morio, S. Kawahara, N. Okamoto, T. Suzuki, T. Okamoto, M. Harada and A. Shimizu</i> | 295 | An expert system for early detection of cancer of the breast  |
| <i>K. Francis</i>   | 307 | The use of the ventilatory anaerobic threshold for the development of exercise guidelines   |
| <i>W. Bingger, R. H. Mitchell, D. W. G. Harron, J. P. McKaigue and R. B. McAloney</i>     | 319 | Real time analysis of Valsalva's Maneuver   |
| <i>K. Francis</i>   | 331 | Determination of functional aerobic capacity using the microcomputer  |
| <i>H. Mansour</i>   | 337 | A new strategy for clinical decision making—II. The circumscription of non-monotonicity and differential diagnosis for thyroid diseases |
| <i>A. G. Amador and S. L. Hodges</i>  | 343 | Programs for radioimmunoassays and radioreceptor-assays using SPSS-X <sup>R</sup>   |
| <i>S. Yaari and U. Goldbourt</i>  | 353 | A SAS program for evaluating person-years of risk in cohort studies   |
| <i>R. W. Brill and P. G. Bushnell</i>   | 361 | CARDIO—a Lotus 1-2-3 based computer program for rapid calculation of cardiac output from dye or thermal dilution curves                 |
| <i>G. E. Dallal</i>   | 367 | TRACK: a FORTRAN program for calculating the Foulkes-Davis tracking index   |
| Announcement  | 373 | Medical Information Europe 91 (MIE 91) Tenth International Congress   |

## Software Survey Section

### I

### Number 6

- |  |     |   |
|--|-----|---|
| <i>J. H. U. Brown</i>                      | 375 | A new computer memory for biology and medicine using the laser card   |
| <i>N. H. F. Beebe and R. P. C. Rodgers</i> | 385 | <PLOT79>: a comprehensive portable Fortran scientific line graphics system, as applied to biomedical research |

<i>A. Sette, L. Adorini, C. Mancini and G. Doria</i>	403	An Apple IIE microcomputer program for multiple non-independent comparisons by the Scheffe's test
<i>S. Abboud and D. Sadeh</i>	409	Spectral analysis of the fetal electrocardiogram
<i>G. E. Caldwell and A. E. Chapman</i>	417	Applied muscle modelling: implementation of muscle-specific models
<i>B. P. Hayes, R. Poulson and F. W. Fitzke</i>	435	A new computer method for the measurement of the thickness of basement membranes
<i>T. A. J. McEwen and A. A. F. Sima</i>	443	Microcomputer collection and analysis of <i>RR</i> -interval data in the BB-rat
<i>R. P. Miller and R. A. Farley</i>	453	AAQUANT: a computer program for quantitative amino acid analysis of proteins and peptides
<i>M. Kapadvanjwala and S. S. Sofer</i>	461	A mathematical simulation of the AIDS patient and extracorporeal detoxification
Announcement	471	International Conference on Parallel Processing in Neural Systems & Computers
Software Survey Section	I	Obstetric Ultrasound Database System
	II	HIST
	II	LING
	III	Barrier 1
Title Page, Volume Contents and Author Index	i
